# preface

Welcome to Magic Spell Book II of the Code of Elements.

In this second volume, we want to show you the possibilities that are completely different from the first volume (and its extension), so in addition to the beautiful graphics, this volume will focus more on showing combinations and new depiction methods that can form a unique painting style.

This is a free, open source code.

If you find non-English separators, misspelled words, weird carriage returns, or even anything that doesn't seem to be explained by science – don't worry, it's all ***part of the spell.***

For possible "generic negatives" in volumes, they are lowres, bad anatomy, bad hands, text, error, missing fingers, extra digits, fewer digits, cropped, worst quality, low quality, normal quality, jpeg artifacts, signature, watermark, username, blurry, bad feet mean.

**We reserve no rights to the images produced, based on the spirit and reality of the Internet.**

## Elemental Magic Catalog - II - Style Chapter

This chapter is especially dedicated to works that specialize in introducing particular styles of painting or compositional forms, and they are particularly good at making them refreshing. Some works that introduce a newer style but only use it as an auxiliary element are excluded.

It can be changed to other animals such as white tiger, dragon (Chinese dragon) and the like, but it is unstable, and the resolution of 512×512 is of good quality, but there are sometimes surprises when pulling up

Blue is more important in color ink, if you want to try the style, you can try to add one

The green inside can be replaced with fire or water for surprise, of course, you can also change to other ones but haven't tried it

This 100% TAG utilization and 100% detachability will be a glimpse of the universal sequential formula.

Cat Hat and SunHat are two different tags, but because they have the same "**suggestion pre**" (tags have a tree-like "suggestion pre" distribution), they can be used together, as can cat ears and cat hat. In the same way, robe is used as the recommended front of sleeves past wrists, and then as the recommended front of sleeves past fingers, emphasizing the leaves of the front tree can strengthen the presence of the whole tree.

leggings and cat tail use weak weights and allow crowding in the last position where the "thing" is attached. legging is used to provide black socks instead of bare legs when the AI wants to pat the legs, and 0.85 is the threshold at which it does not significantly affect the composition. Cat tail is counterproductive to the above, weakening the leaves of the front tree can weaken the presence of the entire tree, so that the cat tail attribute that comes with the cat tail attribute does not pollute the scarf - the same is true for the fireflies below.

No light is used to create abnormal lighting, specifically manifested as bizarre passive strong light, with a black sky with a gap of about 3~6 words in the middle.

The most important thing is naturally the fusion of dark shadow and greyscale, which is used to **erase details** together with the illustration at the beginning. The illustration placed in the style indicator section + the half-painted greyscale placed in the filter segment are higher than what flat color or sketch or partly colored is so high that I don't know where to go.

This spell is not copied or stacked at will, except for the first few common spells (cropped, blurry, etc.), everything else is adjusted for the picture elements. First of all, the limbs and facial features are counter-spelled (malformed, misplaced, weird, etc.), then special designations are made for ears (otherwise it is extremely easy to generate cat witches with three or four ears), and finally strange animals are specified to avoid spawning strange cats. (Useful when spawning beast-eared maidens)

At the beginning, there are some common quality entries, followed by the main body of the picture (fox-eared girl), and finally specify various elements. (Pink Hair performance is not obvious but can significantly improve the color temperature performance of the overall picture, change to blue hair to get a fairly blue picture)

Negtag:

(poorly drawn hands), (poorly drawn face), weird, (((fat))), ((cropped)), ((fused fingers)), ((too many fingers)), (malformed limbs), (((bad anatomy))), ((ugly)), out of frame, blurry, gross proportions, distorted face, distorted body, ((distorted fingers)), missing leg, more than 2 leg, more than 2 feet, more than 2 arms, text, ui, signature, icon, watermark, misplaced limbs, leg too big, leg too small, fused hands, fused arms, distorted background, fused buildings, ((finger too short)), more than 1 right hand, more than 1 left hand, wrong direction of limbs, wrong direction of legs, wrong direction of feet, misplaced facial features, unbalanced facial features, ((body too long)), ((arm too short)), (poorly drawn joint), misplaced joint, wrong joint angle, disappearing legs, disappearing arms, disappearing limbs, ((fused limbs)), thumb too long, fingers too long, missing hands, missing arms, ((misplaced animal tail)), ((malformed animal tail)), poorly drawn animal tail, less than 2 ears, ((more than 2 ears)), ((more than 2 animal ears)), ((one arm longer than another)), ((missing palm)), ((palm disappeared)), sharp fingers, ((two eyes in different size)), weird ears, weird animal ears, (weird finger), (weird hand), weird limbs, weird arms, weird legs, thin wrist, more than 2 eyes, malformed eyes, misplaced eyes, strange animals, (3 fox ears:1.7), (fox ear in middle), (hands)

Although this counter-spell is quite long, it is not randomly stacked and copied. First of all, there are some common counter-spells (such as blurry, cropped, etc.), then there are counter-curses related to limbs, facial features, ears, tails (weird, malformed, misplaced, wrong number, etc.), and then because occasionally there are cases of turning 180 degrees of feet, joint-related counter-spells are also added. Finally, because the AI has a high probability of generating 3 or more fox ears, it is specifically limited to 3 fox ears.

In actual use, you can remove the counter-spells related to your limbs or facial features by yourself, although it will greatly reduce the lower limit, but the upper limit has little effect.
